

MOHAMED HARISH HAMEED

Java FullStack Angular Developer | Software Developer | Front-End Expertise

+919578596663 @ harishhameed007@gmail.com https://harish030.github.io/portfolio/ https://www.linkedin.com/in/mohamed

SUMMARY

Dedicated Software Engineer with 5 years of hands-on experience, specializing in Angular front-end development and 2 years of experience in Java Spring Boot for building scalable backend services. Proven expertise in designing and delivering enterprise-grade web applications, integrating RESTful APIs, and following Agile/Scrum methodologies. Strong collaborator with cross-functional teams, focused on writing clean, maintainable code and delivering high-quality, performance-driven solutions.

EXPERIENCE

Software Engineer

Matrimony.com

07/2024 - Present Chennai, India

- Improved app functionality by integrating 3 custom Capacitor plugins for Angular-based hybrid applications.
- Refined and maintained Angular web and hybrid mobile applications using Ionic and Capacitor, designing reusable UI components and optimizing application stability and performance through best practices.

Software Engineer

Careem

12/2023 - 06/2024 Remote

- Expanded scalable backend services, increasing application efficiency by 25% through Java Spring Boot for enterprise-level applications.
- Enhanced responsive front-end features using Angular, while gaining strong hands-on experience in Core Java concepts, application performance optimization, and system reliability.

Software Engineer

Hakuna Matata Solutions

10/2021 - 11/2023 Chennai, India

- Delivered 5+ customer-centric web applications using Angular 13+, integrating SOAP and REST APIs, and optimizing front-end performance by 20% through Angular and JavaScript best practices.
- Built reusable, testable components that reduced development time by 30% and improved team productivity by 15%, while collaborating with UX teams and championing Agile Scrum (Jira) to cut time to market by 15% and improve cross-team communication by 50%.

Blockchain Developer

Sigma Labs

03/2021 - 09/2021 USA

- Integrated blockchain solutions, boosting platform efficiency by 30% through developing dApps and smart contracts.
- Created application modules using Angular, Solidity, TEAL, Internet Computer. Refined performance, accelerated development, fine-tuned user engagement, reduced bugs.

EDUCATION

Bachelor of Engineering in Computer Science

Anna University

08/2017 - 02/2021 Tamil Nadu

PERSONAL PROJECTS

Real-Time Communication Platform

Developed a real-time chat audio-video web application using Angular and Spring Boot. Implemented Web Socket communication with STOMP and Sock JS for low-latency, bidirectional messaging. **App Link** : <https://harish030.github.io/chat-audio-video/#/login>

Drowsiness Detection System

Developed real-time eye and facial landmark tracking to alert users when signs of drowsiness are detected.

PROFESSIONAL PROJECTS

Niral.ai

Converts Figma designs into functional frontend code, enhancing development speed and accuracy.

Diabos.

A maritime ecosystem platform to monitor and manage maritime operations and data.

Lectie.

Enabled users to schedule events, set reminders, and manage their daily tasks efficiently.

Match Astro

Astrology-based matching platform offering personalized compatibility insights using birth charts and zodiac signs.

Bio Data

Manage and organize personal profiles efficiently with create, update, and retrieval functionality.

SKILLS

Technical Skills

Angular JavaScript TypeScript SQL

Java Spring Boot Hibernate

Node.js HTML5 CSS3 Tailwind CSS

Bootstrap Angular Material NgRx

RxJs Ionic Capacitor CI & CD

RESTful APIs GraphQL NPM

Webpack Git version control

Soft Skills

Strong problem-solving Collaboration

Communication Critical thinking

Analytical skills Attention to detail
